

Health and Safety

Cities for Children Founding
Forum

Stuttgart 25.-26.6.2007

Health and Safety

- Prevention of health threats, promoting healthy eating and providing medical services for parents and children as well as the safety of our children in traffic and their protection against crime should be realized at the highest possible level.

(Cities for Children Network strategy (Draft))

Common Goals

- Developing standards
 - Maternal & child health care, kindergarten, school, student health care, policies, justice system, police etc.
 - Built environment, preserving natural environment, traffic, emissions etc.
- Developing innovative ways providing services for children (new or old ways)
 - Child/youth advisors, etc.
 - Good practices

- Next steps:
 - Cities collect child-related actions and programmes they are having
 - Cities create groups according to the topic (may be 2 different groups; health and safety)
 - Defining more concrete common goals for cities (e.g. 1 car/child)
 - Sharing good practices in a common environment
 - Collecting some decided statistics (What is needed?)

**In general, being born
in Europe gives a child
a good start in life**
